   Institute of Advanced Medical Sciences

2017  Graduate School of Technology, Industrial and Social Sciences (Graduate School of Integrated Arts and Sciences, Graduate School of Science and Technology, Graduate School of Bioscience and Bioindustry reorganized)

2018  Industry-University R&D Startup Leading Institute

2019  Institute of Post-LED Photonics

2020  Graduate School of Sciences and Technology for Innovation
Message from the President

NOJI Sumihare

Tokushima University celebrated its 70th anniversary in 2019. We plan to further strengthen our education, research and social contributions, in order to make even greater advances that solve global issues including the Sustainable Development Goals (SDGs) from a regional standpoint.

In the year 2020, we have merged the master’s degree programs at the Hosanjima Campus into the new Graduate School of Sciences and Technology for Innovation (offering programs in Regional Development, Clinical Psychology, Science and Technology, and Bioresource Science) concurrently with the graduation of the inaugural class of students from the Faculty of Bioscience and Bioindustry. Consequently, the current post-graduate education is composed of eight graduate schools which include the Graduate Schools of Integrated Arts and Sciences, Medical Sciences, Oral Sciences, Pharmaceutical Sciences, Nutrition and Bioscience, Health Sciences, and Advanced Technology and Science. We also have two research-focused organizations of faculty members: the Graduate School of Technology, Industrial and Social Sciences and the Graduate School of Biomedical Sciences.

Our undergraduate programs are offered through six faculties: the Faculty of Integrated Arts and Sciences, the Faculty of Medicine, the Faculty of Dentistry, the Faculty of Pharmaceutical Sciences, the Faculty of Science and Technology, and the Faculty of Bioscience and Bioindustry. We are also home to the Institute of Advanced Medical Sciences, which leads the world in cutting-edge life sciences research; the Institute of Post-LED Photonics, which conducts research into innovations that tap into the power of light to secure the future of our world; and the Industry-University R&D Startup Leading Institute, which promotes academic-industrial collaboration at the organizational level and adopts a systematic approach to the formation of startups. In addition, our university hospital is a leader in the provision of state-of-the-art medical care. While Tokushima University’s strengths lie in the sciences, we also offer a sound education in the humanities through the Faculty of Integrated Arts and Sciences.

This distinctive array of schools is one of our key features and, over the years, we have nurtured many high achievers. One such eminent alumnus is the recipient of the 2014 Nobel Prize in Physics, Professor Shuji Nakamura (Materials Department, College of Engineering, University of California Santa Barbara (UCSB)), who earned his master’s degree from Tokushima University’s Graduate School of Engineering. Other notable alumni include Dr. Keiji Tanaka (Chairperson, Tokyo Metropolitan Institute of Medical Science), who pursued a career in the life sciences after graduating from our Faculty of Medicine’s School of Nutrition and has been honored by the nation as a Person of Cultural Merit, and, in the world of industry, Toshiaki Higashihara, a graduate of our Faculty of Engineering who is now Representative Executive Officer, President & CEO and Director at Hitachi, Ltd. Besides these alumni, many other Tokushima University graduates make an active contribution in a multitude of fields.

To bring the whole university together in pursuing an integrated approach to education and research, we have established collaborative frameworks known as research clusters and education clusters. In addition, we founded the Center for Community Engagement and Lifelong Learning to enhance partnerships with the community and are pursuing partnerships with companies through the Center for Research Administration & Collaboration and the Industry-University R&D Startup Leading Institute. To secure new sources of external funding, we are making use of the Otuscle academic crowdfunding platform, as well as providing support for research expenditure by setting up the university’s own investment partnership. These approaches also enable us to work in partnership with various organizations, including other universities. We hope that you will continue to support the endeavors of the faculty members and students of Tokushima University.

The vision and mission of Tokushima University

Vision
Tokushima University will search for truth, create knowledge, and inherit and develop eminent sciences and cultures with a spirit of independence and autonomy. We will contribute as a global university to establish a robust and abundantly prosperous society.

Mission Statements

Education
1. To educate students systematically and practically to inspire them to feel, consider, and study with ambition for all their lives.
2. To cultivate future leaders who can autonomously attempt to address world-wide problems with enterprising spirits.

Research
1. To conduct research that explores fundamental truths through unfettered thought.
2. To conduct research that solves social issues on the earth.
3. To contribute to the peaceful development of the international and regional community by returning the research products of the university to society.

Social contribution
1. To be the center of a network of knowledge linking the regional community with the world in order to establish a peaceful and cultural community of nations and a vibrant regional society.
2. To be a base for social advances through cooperation among industry, government, and academia, establishing new industries in the regional community, while supporting lifelong learning by opening the facilities of the university to the public.

Graduate Schools

Graduate School of Sciences and Technology for Innovation

Through a new education system and academic course that blends the humanities, the social sciences, human science, natural science, engineering, and biotechnology, the Graduate School of Sciences and Technology for Innovation aims to cultivate highly skilled professionals capable of creating new value (innovation) in the realms of science, technology, industry, and society based on global and interdisciplinary viewpoints, while taking into account medium- to long-term needs in industry, business, and society as a whole.

Graduate School of Integrated Arts and Sciences

The Graduate School of Integrated Arts and Sciences aims to achieve Integrated Sciences of Community Development through a comprehensive and interdisciplinary approach including integrated humanities and sciences to the regional, social and environmental issues that confront modern society. To that end we seek to foster people engaged in the creation of an environmentally harmonious community that comprehensively fuses and maintains the cultural, social and natural environments. At the same time, we aim to train educators and researchers, and professional practitioners who will play a role in regional revitalization and reconstruction.

Graduate School of Medical Sciences

Through interdisciplinary medical science education, we foster researchers and clinicians who have insights into bioethics enabling them to develop bioscience and respond to advances in medicine. With strong research capabilities and learning, unbiased by science and technology, they are able to contribute with a social outlook. In addition, as a graduate school with the dynamism to undertake and realize individualistic research and create the future, we aim to contribute to the progress of medical science and promotion of public health.

Graduate School of Oral Sciences

(1) Oral Health Promotion develops people with deep specialist knowledge and skills in oral health focused on welfare for longevity, and a scientifically questioning mind. Our educators and researchers are the next generation of dental hygienists and our advanced specialists contribute to realizing a society with healthy longevity. (2) Through applied education and research, and academic theory concerning bioscience focused on stomatology, Oral Sciences fosters people with a broad scientific foundation, with superior specialization, who can play a leading role in education, research, clinical practice, and the regulation of dentistry.

Graduate School of Pharmaceutical Sciences

We aim to foster human resources with the ability to positively develop working places of their own based on the collaboration of various fields of pharmacy, which we call “Interactive YAKUGAKUJIN”.

(1) The Course of Pharmaceutical Sciences aims to foster human resources having capabilities to carry out research in drug discovery and manufacture with a broad perspective and international competence through systematic education and research guidance. (2) The Course of Pharmacy aims to foster leading pharmacists and researchers of clinical pharmacy, who have high capabilities to carry out research contributing to leading-edge medication treatment and contribute to promoting health of the public, through research guidance directly connected to the clinical setting and practical training of such as risk management as pharmacists.

Graduate School of Nutrition and Bioscience

We aim to train advanced medical professionals who are active in medical institutions, the local community, and industrial fields, and advanced educational researchers who work in education and research institutions. From basic life science to wide-ranging education on human nutrition including various medical-related knowledge, we undertake leading research that can respond to social demands. We aim to contribute to the development of nutritional science by developing human resources and making social contributions through the results of education and research.

Graduate School of Health Sciences

Through practical and empirical education and research in the health sciences, we aim to train humanistic advanced medical specialists, educators and researchers with a foundation in bioethics and team medicine, who can respond to diverse social needs. At the same time, we aim to undertake leading research that can meet the demands of society, and to contribute to the development of health sciences based on the principles of health promotion, disease prevention, advanced medical care, recovery support, and life support.

Graduate School of Advanced Technology and Science

We develop personnel with the ability to analyze and solve problems that occur in modern society from a wide perspective based on fundamental knowledge of engineering. They have the autonomous adaptability and creativity to adapt flexibly to changes in society, presenting world-leading research results and contributing to the creation of a prosperous and healthy society. In addition, we promote technological development through reeducation of working people and collaborative research with regional companies in order to build a peaceful international community and revitalize international exchange.

Institute of Liberal Arts and Sciences

The Institute of Liberal Arts and Sciences is the first place where students learn upon entering Tokushima University. Its goal is to promote the formation of individuals with high ethical standards and a broad outlook through studies across a wide range of disciplines, including science, technology, culture, economics, and social studies, thereby laying the academic foundations that will enable our students to go on to build sustainable natural and social environments for the future.

The Institute’s Language Education Center operates a Language Learning Mileage Program. We have integrated our language education system into our undergraduate programs, aiming to cultivate individuals with adequate practical language ability by nurturing linguistic abilities, communication skills, and self-study capabilities appropriate to each student’s goals and objectives.
Research organization

Research Clusters

We have developed a plan for the reorganization of Tokushima University, and as our MTP (massive transformative purpose) based on the philosophy of Tokushima University, we have set the following purposes: 1. In order to realize innovative medical welfare that protects human health, we will publish our findings as papers and to make them more available to society as a whole, we will develop various medical technologies, medical products, pharmaceuticals and so on. 2. By solving the problems of humankind and making our findings available in a timely manner, we will contribute to the peaceful development of the international and regional community. In order to promote research towards achieving this, it is necessary to create an environment in which the university can produce innovations, such as research that cuts across the boundaries of faculties and research fields. Therefore, we have organized research groups ("Research Clusters") comprising multiple researchers in various fields, effectively allocated research expenses, and established a system to select and support research that can contribute to the realization of our philosophy. 

The significance and purpose of Research Clusters

(1) Clarify the strengths (brand image) of Tokushima University by publishing our research results
(2) Secure funds to promote research and invest them to strengthen the foundation of the university as a whole
(3) Reorganize the research organization of the university focused on Research Clusters where significant results can be expected

Institute of Advanced Medical Sciences

The Institute of Advanced Medical Sciences (IAMS) was founded in April 2016 by reorganizing the Institute for Enzyme Research and the Institute for Genome Research, and by annexing the Fuji Memorial Institute of Medical Sciences and the Diabetes Therapeutics and Research Center. It was also certified by the Ministry of Education, Culture, Sports, Science, and Technology as a National joint-use facility. IAMS consists of three main divisions: The “Basic Research Division” aims to elucidate the pathophysiology and apply medical applications on the basis of the leading research results as the only enzyme research base in Japan. The “Priority Research Division” aims to create and lead new academic fields by grasping lifestyle-related diseases such as diabetes, which is a prefectural disease of Tokushima Prefecture, as well as cancer and immune diseases with a common underlying pathology of “chronic inflammation”. “Technology Development Support Division” strongly supports individual research activities and research collaborations. We promote cutting-edge medical science research in these divisions, aiming to foster research human resources who will lead the next generation and to realize a healthy and long-lived society.

URL: http://iams.tokushima-u.ac.jp/

Fuji Memorial Institute of Medical Sciences

Fuji Memorial Institute of Medical Sciences was established to commemorate Dr. Setsuro Fuji, a former professor at Tokushima University, who developed many pharmaceutical drugs. The mission of the Institute is to conduct outstanding and interdisciplinary bioscience research that lead to the innovation in our society. The institute provides state-of-the-art facilities to enable cutting-edge research and innovation.

URL: http://www.fuji.tokushima-u.ac.jp/

Diabetes Therapeutics and Research Center

Diabetes Therapeutics and Research Center is focusing basic research and clinical therapeutics to overcome diabetes, serious health problems not only in Tokushima, but also in all over the world.

The mission of this center is to build up a platform for translational medicine, which brings basic research to clinical practice for diabetes care in the local area and all over the world.

URL: https://www.tokushima-u.ac.jp/dtcr/

Institute of Post-LED Photonics

Institute of Post-LED Photonics (pLED) was established in March 2019 to strengthen photonics research at Tokushima University for the purpose of the creation and application of next-generation light. While visible and near-infrared lights have been already used in various applications, application of deep-ultraviolet, mid-infrared, and terahertz lights are still undeveloped. Main goal of pLED is to extend the use of photonics to these undeveloped wavelength regions and explore their new applications. As a core research facility supported by Subsidy for Regional University / Regional Industry Creation in Cabinet Office (project name: Tokushima Plan for Industrial Development and Youth Employment Creation by the Creation and Application of Next-Generation Light), we will conduct advanced research for the development of next-generation light sources and biomedical photonics research, and will finally contribute to the realization of a creative aging society and promotion of regional industry.

URL: https://www.pled.tokushima-u.ac.jp/

Research Center for Management of Disaster and Environment

We promote research on local disaster prevention and conservation of the natural environment, and we aim to fulfill our responsibility to contribute to the community through community-based activities.

The Center was established in 2004 to conduct general research into the environment and disaster prevention. From 2010, it was made one of the Joint Institutes for Education and Research. In order to undertake both local disaster prevention measures and environmental protection, the center promotes organic cooperation between a wide range of academic fields including engineering, science, humanities and social science, medicine and pharmacology.

URL: https://www.tokushima-u.ac.jp/rcmode/
Faculty organization

Graduate School of Technology, Industrial and Social Sciences

Based on the various sciences and natural sciences concerning humanity and society, we aim to create new industry and society by promoting interdisciplinary and comprehensive research focused on Integrated Sciences of Community Development corresponding to social requirements, research concerning advanced science and technology, and basic and applied research in biotic resources. In this way, we aim to contribute to the development of humanity and social science, natural science, and science and technology.

Graduate School of Technology, Industrial and Social Sciences
Division of Integrated Arts and Social Sciences
Division of Science and Technology
Division of Bioscience and Bioindustry

Graduate School of Biomedical Sciences

With a common foundation of medicine, dentistry, pharmaceutics, nutrition and health science, we aim to promote life science research, to elucidate the causes and pathological conditions of diseases, to develop therapeutic methods and preventive methods, and to contribute to the promotion of public health and welfare.

URL: https://www.tokushima-u.ac.jp/bms/

Graduate School of Biomedical Sciences
Division of Medicine
Division of Dentistry
Division of Pharmaceutical Sciences
Division of Health Sciences
University Hospital

The hospital currently comprises 21 medical clinics, 4 dental clinics, and 59 central clinical facilities. It has 692 beds. As an advanced treatment hospital, it provides leading edge medical and dental care.

In addition, using the geographical proximity of Tokushima University Hospital and Tokushima Prefectural Central Hospital to the maximum, the two hospitals aim to capitalize on their human and infrastructural characteristics to pursue further cooperation towards an effective division of functions. They have completed the general medical zone that aims to improve the quality of medical care in the prefecture as a whole.

Bearing in mind the keywords of regional healthcare, coordination and functional differentiation, Tokushima University Hospital will foster medical professionals with high ethical standards, seeking to develop advanced medical care characterized by a global vision that is grounded in the local community.

Number of Patients in Each Clinical Division

Inpatients 7,554
Outpatients 106,447

Industry-University R&D Startup Leading Institute
URL: https://industrial.tokushima-u.ac.jp/

The Industry-University R&D Startup Leading Institute established in April 2018 is an organization under the direct control of the president with the purpose of social implementation of the research results of the university. It is active in a special zone within the university as an organization that promotes education, research and industry to solve global problems, modeled on the university hospital.

In the Research and Development Division, the Industry-University R&D Startup Leading Institute coordinators intensively support affiliated researchers inside and outside the university promoting industry-academia collaboration activities, social implementation, and establishment of university ventures. In addition, in order to promote organization-to-organization academic-industrial cooperation, the Strategic Planning Division will plan projects for creating new industries, plan projects linking society and the university, and conclude partnership agreements. In April 2019, the Education and Management Support Division was established to develop students and faculty with entrepreneurial awareness and a business mindset, and to undertake entrepreneurship education, and educational activities such as seminars. In October, we established a Startup Studio U-tera for entrepreneurship.

At the Industrial Institute, these three divisions will work together to promote a new model for the creation of industry based at Tokushima University, as a new approach to research and education. By rapidly commercializing and industrializing the results, we aim to solve global issues from the region.

Social contribution organization

Center for Community Engagement and Lifelong Learning

The Center for Community Engagement and Lifelong Learning serves as a base for the university’s recurrent education and regional revitalization, with the aim of co-creating the human resources that contribute to a creative society and its communities in response to the lifelong learning of diverse people. We work on solutions to local problems and the creation of prosperous communities. Established in April 2019, the Center has taken over the roles previously managed by the Center for Community Revitalization, the Center for University Extension, the Division of Professional Development within the Center for Research Administration & Collaboration, and the Management Bureau for the Special Project called “The Center of Community” (COC+).

URL: https://www.tokushima-u.ac.jp/cell/

Center for Administration of Information Technology

In order to carry out smoothly the university-wide ICT policies and information-related work for education, research, social contribution and organization administration at the university, we support information education and the implementation of ICT in each department, while conducting research and development in ICT. Taking advantage of the Center’s experience in ICT and information security management systems, we support the development of human resources and information security activities in local communities.

URL: https://www.ait.tokushima-u.ac.jp/

Center for Research Administration & Collaboration

In 2015 Tokushima University launched its Center for Research Administration & Collaboration deploying University Research Administrators (URA) and Industry-Academia-Government Cooperation Coordinators. This Center support university function reinforcement, intra-university synergies and research environment enhancement, and actively coordinates collaborative research projects and other collaborations between the university and industry or government as a means of returning the benefits from university research results back to society.

URL: https://www.tokushima-u.ac.jp/ccr/

Shikoku Innovative and Collaborative Organization for Industry, Academia and Government

Shikoku Innovative and Collaborative Organization for Industry, Academia and Government (SICO) aims to create innovation from Shikoku region through improving our operational efficiency by organizing and consolidating the duplication of tasks relating to the work common to industry-academia-government collaboration among the five universities (Tokushima University, Naruto University of Education, Kagawa University, Ehime University, and Kochi University). We are working to enhance both the quality and quantity of knowledge across all the participating universities, accumulating knowledge, developing human resources, establishing contacts between universities and societies in Japan and abroad, and creating a base for the creation of innovation.

URL: https://www.tokushima-u.ac.jp/ccr/sico/

Support organization

Advance Radiation Research, Education, and Management Center

The Center is a facility used for education and research conducted using radioactive isotopes. It also conducts radiation safety management of radioactive isotopes, and research, development, and information collection for that purpose. In addition, it plays a comprehensive and central role concerning radiation such as providing necessary education and training for research staff and students engaged in radiation work and supporting research, contributing to the advancement of education and research. We aim to contribute to the dissemination of knowledge concerning radiation in the local community.

URL: http://ric6.ri.tokushima-u.ac.jp/eRIRC.html

Research Center for Higher Education

In order to strengthen our consistent education and student support from student admission to job placement, we work on student selection, education reform, ICT-based education, innovative education, international education, student life, and career formation from a university-wide perspective. By adding related teachers and staff supporting the operation, we aim to consolidate and improve operations through cooperation between organizations and teaching staff collaboration.

URL: https://www.tokushima-u.ac.jp/highedu/

AWA Support Center

Our goal is to promote gender equality at the university, and foster the teaching and research environment such as diversity and potential for growth. We are willing to take the lead in achieving gender equality. We will undertake our activities with a view to collaboration with the local community and industry-government-academia with the aim of becoming a university that can realize the benefits of a society based on gender equality.

URL: http://www.awasapo.tokushima-u.ac.jp/
Center for Teacher Education

We promote the maintenance and consolidation of teacher training courses, liaising and cooperating with education-related institutions within and outside the university, with the aim of raising the quality of teacher development and in-service teacher training.

Advanced Research Promotion Center

In order to provide high-level comprehensive support and activities across the whole university, it was established in April 2019 by transferring the functions that were borne by the General Research Support Center of the Graduate School of Biomedical Sciences to a university-wide organization. The Bioimaging Department supports cutting-edge imaging research activities from molecules to animals, and the Animal Resources Research Department conducts education and research on animal experiments throughout the university, supporting the breeding and management of experimental animals, development, and animal experiments.

Division for Animal Research Resources and Genetic Engineering
URL: http://cms.db.tokushima-u.ac.jp/DAR/organization/10998/

Center for Design-Oriented AI Education and Research

Consisting of the Division for Promotion of AI Education, the Division for AI Research Development, and the Division for AI Social Implementation, the Center for Design-Oriented AI Education and Research aims to contribute to regional economic development through advanced AI-related research. In doing so, the center seeks to respond to our rapidly advancing digital society by tapping into AI technology and data science, working with IT companies and developing talented individuals who acquire the design thinking and expert knowledge to solve social issues, while taking into account trends in the international community and the needs of local companies.

URL: https://www.tokushima-u.ac.jp/ai/

Archaeological Heritage Management Office

We conduct the following work concerning excavations of buried cultural properties necessitated when facilities are improved; (1) Planning and implementation of execution plans, (2) Organization, storage and preservation of excavated buried cultural property, (3) Preparation of reports, (4) Other necessary matters concerning excavations of buried cultural properties.

URL: http://tokudaimailbun.jp/

University Library

The University Library comprises two buildings, the Main Building (Josanjima Campus) and the Kuramoto Annex (Kuramoto Campus). The library supports Tokushima University education and research activities as the main center for academic information at the university. The Associate Director and library staff are there to support education by providing an environment that meets a wide range of learning needs. The materials held by the library are also made available to the public in various ways, contributing to the promotion of local culture.

URL: https://www.lib.tokushima-u.ac.jp/

Health Service, Counseling and Accessibility Center

The Center aims to maintain and promote the health of students and staff, and ensure a good study and work environment. It consists of the following three divisions.
(1) Health Service Division (Health Service Center)
This facility aims to maintain and promote the mental and physical health of all members of the university, students and staff alike. As well as conducting various medical examinations, it provides medical care, assists in health management, and provides health advice.
(2) Student and Staff Counseling Division (Counseling Center)
This center provides a counseling service to assist all university members in dealing with a variety of concerns. It offers expert advice to both students and staff alike concerning issues specific to their respective standpoints.
(3) Accessibility Division (Accessibility Center)
To enable students with disabilities to enjoy a comfortable student life, staff at this center listen to their concerns, draw up plans for the accommodations they require to pursue their studies or research, and work with the relevant faculties and graduate schools on the delivery of those plans.

URL: https://www.tokushima-u.ac.jp/hscs/

Job Support Center for the Challenged

In collaboration with special support schools and other organizations within the university, we support people with disabilities to get jobs, and contribute to promoting employment for them. We aim to create and enhance an environment that supports lifelong development of people with disabilities, and to support the social and occupational independence of them. We perform cleaning of the building and the campus and support the work of each department, handling deliveries within the university and accepting students on workplace training from special-needs schools.

Key Dates for Academic Year

First Semester (April 1 - September 30)
- April 1 - April 5: Spring Vacation
- April 1 - April 7: New Student Orientation
- April 5: Entrance Ceremony
- August 1 – August 31: Summer Vacation

Second Semester (October 1 - March 31)
- November 2: University Anniversary
- December 25 – January 7: Winter Vacation
- March 23: Graduation Ceremony
- March 25 - March 31: Year-End Vacation

Basic data
- Number of Students 7,390 (Faculties 5,902, Graduate School Master’s and Doctoral Courses 1,488)
- Number of Staff 2,347 (Executive Director 10, Professors 246, Associate Professors 191, Lecturers 119, Assistant Professors 232, Designated Teachers 153, Clerical Staff · Technical Staff · Medical Staff 1,396)
- Finance (FY 2019) Unit: million yen
  - Revenues 49,537 [Management Expense Grants for National University Corporations 13,025, Self-income 30,140 (Hospital Revenue 25,528)]
  - Expenditures 48,113 [Expenses for Education and Research 16,286, Expenses for Hospital 24,432]
Location & Transportation

Transportation

Airplane
- Tokyo (Haneda) to Tokushima [about 70 minutes]
- Fukuoka to Tokushima [about 90 minutes]

Train
- Okayama to Tokushima (express) [about 130 minutes]

Highway bus
- Kyoto to Tokushima [about 165 minutes]
- Osaka to Tokushima [about 150 minutes]
- Kansai Airport to Tokushima [about 165 minutes]
- Kobe (Sannomiya) to Tokushima [about 100 minutes]

Ferry
- Wakayama to Tokushima [about 2 hours]

Distance from JR Tokushima Station
Transportation • Time
- Shinkura Area (about 1km) about 5 minutes by taxi
- Josanjima Campus (about 2km) about 7 minutes by taxi
- Kuramoto Campus (about 4km) about 10 minutes by taxi

(See the map on Page 12)
University Crest

The crest is a design based on the letters U and T, standing for University and Tokushima. The square background represents Shikoku where Tokushima University is located. The overlapping U symbolizes the contributions of the university’s scholarship and education to the development of the local and international community, as well as the inheritance of knowledge and culture. The colors represent Yoshino River symbolizing the perpetual flow of promising personnel from Shikoku to the world, the blue sky and blue sea of Tokushima symbolizing the aspirations of youth, and indigo, one of Tokushima’s native products. (Adopted on 2001)

Communication Mark

This symbol represents the venue for unique, vibrant, future-oriented education and research cultivated by Tokushima University for 60 years based on a progressive spirit. The five colors represent the following concepts.

- A place for forming character of abundant professionalism and humanity
- Research that pursues the truth through unfettered thought
- The center of a network of knowledge which links the local community with the world
- The beautiful natural environment of Tokushima Prefecture and the greenery of the city, especially Mt. Bizan and Shiroyama
- The rich aquatic environment, especially the Yoshino River

The typeface is Trajan, based on an inscription on Trajan’s Column. This Roman script represents the history of academic pursuits and the tradition and dignity of the university. The illustration on the left represents the dynamism of a fresh start with the fluidity of water. (Adopted on 2010)

In accordance with Article 109 Paragraph 2 of the School Education Act, Tokushima University has undergone university evaluation and met the evaluation standards for a university. (March 24, 2020)

Certified evaluation organization: National Institution for Academic Degrees and Quality Enhancement of Higher Education
Certification period Seven years
