

International Special Lecture (ONLINE)

From an innovative research to a successful startup - academic entrepreneurship in the Technion

Dr. Sara Lev

Head of the Start-Up MBA Track
t-hub, Technion

“Innovation and entrepreneurship are embedded in the Technion’s DNA.” Technion founded its first entrepreneurship course more than 30 years ago. Now, t-hub -- the Technion Entrepreneurship and Innovation Center expands its entrepreneurial activities and brings the entrepreneurial culture on Technion to new heights.

Dr. Sara Lev has an extensive experience in educating academic entrepreneurs. She established and leads the Start-Up MBA, which is the leading entrepreneurship program in the Technion.

This lecture will provide a clear explanation of how biomedical and engineering undergraduates, graduate students, and researchers can “Commercialize” their research.
