## History

- 1949** Tokushima University (Faculty of Liberal Arts and Education · Faculty of Medicine · Faculty of Engineering)  
University Hospital
- 1951** Faculty of Pharmaceutical Sciences
- 1955** Graduate School of Medicine (Reorganized as Graduate School of Medical Sciences in 2004)
- 1964** Graduate School of Engineering  
(Reorganized as Graduate School of Advanced Technology and Science in 2006)
- 1965** Graduate School of Pharmaceutical Sciences  
(Reorganized as Graduate School of Pharmaceutical Sciences in 2004)
- 1966** Faculty of Education (Faculty of Liberal Arts and Education renamed)
- 1969** Graduate School of Nutrition  
(Reorganized as Graduate School of Nutrition and Bioscience in 2004)
- 1976** Faculty of Dentistry
- 1983** Graduate School of Dentistry  
(Reorganized as Graduate School of Oral Sciences in 2004)
- 1986** Faculty of Integrated Arts and Sciences (Faculty of Education reorganized)
- 1994** Graduate School of Human and Natural Environment Sciences  
(Reorganized as Graduate School of Integrated Arts and Sciences in 2009)
- 2004** National University Corporation Tokushima University  
Institute of Health Biosciences  
(Reorganized as Graduate School of Biomedical Sciences in 2015)
- 2006** Graduate School of Advanced Technology and Science  
(Reorganized as Graduate School of Science and Technology in 2016)  
Graduate School of Health Sciences
- 2009** Institute of Socio-Arts and Sciences  
(Reorganized as Graduate School of Integrated Arts and Sciences in 2016)
- 2010** University Hospital (University Medical and Dental Hospital reorganized)
- 2016** Faculty of Science and Technology (Faculty of Engineering reorganized)  
Faculty of Bioscience and Bioindustry  
Graduate School of Bioscience and Bioindustry  
Institute of Liberal Arts and Sciences
- 2017** Graduate School of Technology, Industrial and Social Sciences (Graduate School of Integrated Arts and Sciences, Graduate School of Science and Technology, Graduate School of Bioscience and Bioindustry reorganized)
- 2020** Graduate School of Sciences and Technology for Innovation
- 2022** Graduate School of Medicine (Graduate School of Medical Sciences renamed)  
Graduate School of Medical Nutrition (Graduate School of Nutrition and Bioscience renamed)

# Message from the President

## Becoming a deeply shining, future-oriented university

As the world continues to undergo an unprecedentedly rapid transformation, expectations of the ultrasmart Society 5.0 model are growing. On the other hand, anxiety about the aging population and declining birthrate, deterioration of the natural environment, the spread of infectious disease, and numerous other issues are casting a shadow over the future. In order to clarify our vision for the kind of university we should be, as a higher education institution located in Tokushima Prefecture that seeks to cultivate the talented individuals required to solve these complex, advanced issues, we have formulated the INDIGO Declaration. This declaration sets out the image of the kind of person that Tokushima University seeks to nurture, as well as the direction that the university is heading in, and presents this vision to its internal and external stakeholders. Whenever there is a question about the path that Tokushima University's students, staff, or faculty members should choose, or the direction in which the university is heading, the INDIGO Declaration points the way forward.

As a result of dedicated efforts to improve its quality, indigo dye from Awa Province (modern-day Tokushima Prefecture) swept across Japan and Tokushima flourished as a region home to one of the nation's leading cities. Known as "Japan blue," the deeply lustrous shade of indigo has become beloved by people around the world as a color that represents our nation. Indigo has also enriched people's lives and contributed to the development of society, thanks to its diverse array of functions, including insect repellency, weather resistance, and medicinal properties.

The indigo dyeing process involves repeatedly immersing the fabric in an indigo pot in which various substances coexist and then airing the fabric. Through this process, a vivid indigo color appears. Tokushima University aims to cultivate talented individuals in just the same way. Repeated interactions with diverse people, objects, and ideas, both on and off campus, will produce personal growth and develop individuals who will contribute to society through a wide range of abilities. It is Tokushima University's wish to be this kind of place of learning.

The INDIGO Declaration is an expression of this wish. Society's circumstances are constantly changing, and the day will eventually come when an even more advanced dream will be born. When that day comes, we hope that you will offer constructive opinions demonstrating your affection for Tokushima University, so that we can restructure the content of the declaration as circumstances demand.

KAWAMURA Yasuhiko

## The Vision and Mission of Tokushima University

### Vision

Tokushima University will search for truth, create knowledge, and inherit and develop eminent sciences and cultures with a spirit of independence and autonomy. We will contribute as a global university to establish a robust and abundantly prosperous society.

### INDIGO Declaration

We continually respond to the demands of society by providing a place for education and research to help students acquire the sincerity and integrity of character that will contribute to the society of the future, along with the innovative thinking and strength needed to confront global challenges.

We also hope to produce more Nobel laureates.

We manage the university in such a way as to bring out the full potential of students, staff, and faculty members alike, based on the acceptance of diversity in terms of gender, age, nationality, and values. In doing so, we ensure that nobody is left behind.

We promote exchanges with the world as a university that thinks globally and acts from Tokushima. We aim to be a "deeply shining, future-oriented university" that encourages "knowledge fusion reactions" through the sharing of the fruits and challenges of education and research with others both within the university and beyond its boundaries.

### Keywords symbolizing our vision for Tokushima University

Integrity

Noble and Novel

Dynamism and Diversity

Inclusive

Global

Open

## Tokushima University VISION

### The five key elements of the INDIGO Declaration

**Education:** Fostering a spirit of enterprise and cultivating talented individuals who can pave the way for the future

**Research:** Building a platform to generate innovation

**Co-creation with society:** Becoming a regional center for pursuing social collaboration to solve global issues

**Medical care:** Providing advanced, sophisticated, holistic medical care and cultivating medical professionals with abundant humanity

**Organizational management:** Becoming a university that demonstrates appeal and dynamism as an organization

# Faculties

## Faculty of Integrated Arts and Sciences

URL: <https://www.ias.tokushima-u.ac.jp/>

### Gain a global perspective and problem-solve locally

The Faculty of Integrated Arts and Sciences provides knowledge and skills that are in demand in society today. Students will acquire expertise and specialized skills by studying in disciplines across the humanities, anthropology and the social sciences, regional studies, and information science. They will gain a clear understanding of regional issues and many issues that face globalized modern society by synthesizing insights from both general and specialized areas of study. The school aims to develop in graduates the ability to solve problems and contribute to improving the welfare and culture of humankind.

## Faculty of Medicine

URL: <https://www.tokushima-u.ac.jp/med/>

### We offer all the fields of medicine, nutrition, nursing and health science necessary for holistic healthcare

We aim to train people who can contribute to society through education, research, and medical treatment related to medicine, nutrition, and welfare. (1) The School of Medicine trains people to have basic clinical ability and medical research capabilities, who can contribute to society through medical, educational, health and welfare activities throughout their lives, and contribute to the development of medicine. (2) The School of Nutrition, based on the philosophy that nutrition is the foundation of life, undertakes medicine-based medical nutrition research, and trains people who can contribute to sophisticated medical treatment and the maintenance and promotion of health through medical nutrition. (3) The School of Health Sciences supports advanced, specialist medical care based on humanity, science and cosmopolitanism, training people who can respond to diversified needs in health, medical care and welfare, and contribute to the development of health sciences.

## Faculty of Dentistry

URL: <https://www.tokushima-u.ac.jp/dent/>

### Pursuing oral and integrated health for healthy longevity

(1) The School of Dentistry fosters dental students with the latest treatment techniques, broad knowledge of subjects beyond dentistry, and the ethics required of a dental professional. (2) The School of Oral Health and Welfare fosters dental hygienist students to play a leading role in specialized fields of education, research, and clinical practice, contributing to the promotion of health and longevity from the specialist viewpoint of not just oral health, but social welfare as well.

## Faculty of Pharmaceutical Sciences

URL: <https://www.tokushima-u.ac.jp/ph/>

### Aiming to be the best in the world as pharmacists/pharmaceutical scientists

In 2023, we celebrated the 100th anniversary of the Faculty of Pharmaceutical Sciences. We aim to train students to establish the intellectual and technical foundations necessary to become pharmaceutical specialists and to develop a sense of mission and ethics deeply related to medicine. Through these efforts, we aim to nurture "Interactive YAKUGAKUJIN", who are capable of actively developing their own fields in terms of cooperation among various fields related to pharmacy.

## Faculty of Science and Technology

URL: <https://www.tokushima-u.ac.jp/st/>

### Training scientists with engineering sense, and engineers with scientific sense

In April 2016, the Faculty of Science and Technology was launched through the cooperation and integration of the Faculty of Science and Technology (some of the courses of the Department of Mathematical and Material Sciences and Department of Civil and Environment Studies Symbiotic Environmental Studies) and the Faculty of Engineering (all departments except the Department of Biological Science and Technology and the Center for Mathematics and Physics in Engineering Education). We aim to foster independent, socially grounded individuals with a zest for life (intellectual, social and interpersonal, and self-regulating ability), with a keen awareness of social and world problems, which they can tackle using science and technology based on high ethical standards. Combining various specialist knowledge of science and engineering, they will learn to solve problems creatively with unique ideas, making their achievements available to society as a whole.

## Faculty of Bioscience and Bioindustry

URL: <https://www.bb.tokushima-u.ac.jp/>

### Creating the future through the fusion of health, food, agriculture and bioscience

The Faculty of Bioscience and Bioindustry was established in April 2016 as a center for the study of comprehensive academic and technical systems for creating new industries by scientifically explaining the outstanding functions of organisms and the structures supporting them, and leveraging the findings in the production and application of biological resources. The faculty aims to foster people with a broad knowledge of primary industry, food, and bioscience, equipped with knowledge and skills applicable to the commercialization and industrialization of biological resources, who can contribute to the creation of new industries utilizing biological resources from an international perspective.

# Graduate Schools

## Graduate School of Sciences and Technology for Innovation

URL: <https://www.sti.tokushima-u.ac.jp/>

Through a new education system and academic course that blends the humanities, the social sciences, human science, natural science, engineering, and bioresource science, the Graduate School of Sciences and Technology for Innovation aims to cultivate highly skilled professionals capable of creating new value (innovation) in the realms of science, technology, industry, and society based on global and interdisciplinary viewpoints, while taking into account medium- to long-term needs in industry, business, and society as a whole.

## Graduate School of Medicine

URL: <https://www.tokushima-u.ac.jp/med/>

Through interdisciplinary medical science education, we foster researchers and clinicians who have insights into bioethics enabling them to develop bioscience and respond to advances in medicine. With strong research capabilities and learning, unbiased by science and technology, they are able to contribute with a social outlook. In addition, as a graduate school with the dynamism to undertake and realize individualistic research and create the future, we aim to contribute to the progress of medical science and promotion of public health.

## Graduate School of Oral Sciences

URL: <https://www.tokushima-u.ac.jp/dent/>

The school fosters graduate students with a broad scientific foundation, with superior specialization, who can play a leading role in education, research, clinical practice, and the regulation of dentistry, through applied education and research, and academic theory concerning bioscience focused on stomatology. The school also fosters graduate students with deep specialist knowledge and skills in oral health focused on welfare for longevity, and a scientifically questioning mind. Our educators and researchers are the next generation of dental hygienists who contribute to realizing a society with healthy longevity.

## Graduate School of Pharmaceutical Sciences

URL: <https://www.tokushima-u.ac.jp/ph/>

We aim to foster human resources with the ability to positively develop working places of their own based on the collaboration of various fields of pharmacy, which we call "Interactive YAKUGAKUJIN".

(1) The Course of Pharmaceutical Sciences aims to foster human resources having capabilities to carry out research in drug discovery and manufacture with a broad perspective and international competence through systematic education and research guidance. (2) The Course of Pharmacy aims to foster leading pharmacists and researchers of clinical pharmacy, who have high capabilities to carry out research contributing to leading-edge medication treatment and contribute to promoting health of the public, through research guidance directly connected to the clinical setting and practical training of such as risk management as pharmacists.

## Graduate School of Medical Nutrition

URL: <https://www.tokushima-u.ac.jp/med/>

We aim to train advanced medical professionals who are active in medical institutions, local communities, and industrial fields, as well as cutting-edge educational researchers who are active in educational and research institutions. Specifically, we will provide a wide range of education on human nutrition, including basic life sciences and various medical-related knowledge. Furthermore, we would like to contribute to the development of nutrition science by promoting pioneering research that can respond to the demands of society, developing human resources and contributing to society through the results of education and research.

## Graduate School of Health Sciences

URL: [https://www.tokushima-u.ac.jp/med/health\\_science/](https://www.tokushima-u.ac.jp/med/health_science/)

Through practical and empirical education and research in the health sciences, we aim to train humanistic advanced medical specialists, educators and researchers with a foundation in bioethics and team medicine, who can respond to diverse social needs. At the same time, we aim to undertake leading research that can meet the demands of society, and to contribute to the development of health sciences based on the principles of health promotion, disease prevention, advanced medical care, recovery support, and life support.

## Graduate School of Integrated Arts and Sciences (Suspension of Student Recruitment)

URL: <https://www.ias.tokushima-u.ac.jp/>

We aim to achieve Integrated Sciences of Community Development through a comprehensive and interdisciplinary approach including integrated humanities and sciences to the regional, social and environmental issues that confront modern society. To that end we seek to foster people engaged in the creation of an environmentally harmonious community that comprehensively fuses and maintains the cultural, social and natural environments. At the same time, we aim to train educators and researchers, and professional practitioners who will play a role in regional revitalization and reconstruction.

## Graduate School of Advanced Technology and Science (Suspension of Student Recruitment)

URL: <https://www.tokushima-u.ac.jp/e/>

We develop personnel with the ability to analyze and solve problems that occur in modern society from a wide perspective based on fundamental knowledge of engineering. They have the autonomous adaptability and creativity to adapt flexibly to changes in society, presenting world-leading research results and contributing to the creation of a prosperous and healthy society. In addition, we promote technological development through reeducation of working people and collaborative research with regional companies in order to build a peaceful international community and revitalize international exchange.

## Graduate School of Technology, Industrial and Social Sciences

Based on the various sciences and natural sciences concerning humanity and society, we aim to create new industry and society by promoting interdisciplinary and comprehensive research focused on Integrated Sciences of Community Development corresponding to social requirements, research concerning advanced science and technology, and basic and applied research in biotic resources. In this way, we aim to contribute to the development of humanity and social science, natural science, and science and technology.

URL: <https://www.tokushima-u.ac.jp/tiss/>

### Graduate School of Technology, Industrial and Social Sciences

- Division of Integrated Arts and Social Sciences
- Division of Science and Technology
- Division of Bioscience and Bioindustry

## Graduate School of Biomedical Sciences

With a common foundation of medicine, dentistry, pharmaceuticals, nutrition and health science, we aim to promote life science research, to elucidate the causes and pathological conditions of diseases, to develop therapeutic methods and preventive methods, and to contribute to the promotion of public health and welfare.

URL: <https://www.tokushima-u.ac.jp/bms/>

### Graduate School of Biomedical Sciences

- Division of Medicine
- Division of Dentistry
- Division of Pharmaceutical Sciences
- Division of Health Sciences

## Institute of Liberal Arts and Sciences

The Institute of Liberal Arts and Sciences is the first place students learn when they enter Tokushima University. Its goal is to promote the formation of individuals with high ethical standards and a broad outlook through studies covering a wide range of disciplines, thereby laying the academic foundations that will enable our students to acquire the enterprising spirit required to confront various problems in the future and take on the challenge of creating a sustainable society. The institute offers classes in four subject groups, laying the foundations for all specialist fields: liberal arts subjects, sciences and technology for innovation subjects, foundation subjects, and foreign language subjects. We also provide the following distinctive education programs.

URL: <https://www.las.tokushima-u.ac.jp>

### [Liberal Arts Subjects]

These are subjects in a wide range of academic realms relating to the humanities, social sciences, and natural sciences that are taken by all Tokushima University undergraduates, no matter what their faculty, department, or major. The aim of these subjects is to provide students with wide-ranging knowledge and hone their sensitivity and intellect through the study of fields outside their own area of specialization, so that they can incorporate and apply a variety of knowledge to their own field.

### [Data Science Education]

Aiming to produce individuals capable of addressing social transformation based on the government's AI Strategy 2019, the Institute provides information education programs conforming to MEXT's Mathematics, Data Science and AI Smart Higher Education (MDASH) Programs Certification System (Literacy Level and Applied Literacy Level).

### [Innovation Education]

Innovation is defined as the act of creating something new and implementing it in society to transform society itself. The institute offers classes that teach not only the methodologies and mindsets for creating new values, but also the approaches and techniques required for entrepreneurship as a means of implementation in society, creating new businesses, and commercializing research output. These classes are taught both by faculty members with expertise and by external lecturers in the form of entrepreneurs active on the domestic and international stage.

## Institute of Advanced Medical Sciences

The Institute of Advanced Medical Sciences (IAMS) was founded in April 2016 by reorganizing the Institute for Enzyme Research and the Institute for Genome Research, and by annexing the Fujii Memorial Institute of Medical Sciences and the Diabetes Therapeutics and Research Center. It was also certified by the Ministry of Education, Culture, Sports, Science, and Technology as a National joint-use facility. IAMS consists of three main divisions: The "Basic Research Division" aims to elucidate the pathophysiology and apply medical applications on the basis of the leading research results as the only enzyme research base in Japan. The "Priority Research Division" aims to create and lead new academic fields by grasping lifestyle-related diseases such as diabetes, which is a prefectural disease of Tokushima Prefecture, as well as cancer and immune diseases with

URL: <https://www.iams.tokushima-u.ac.jp/>

### Fujii Memorial Institute of Medical Sciences

Fujii Memorial Institute of Medical Sciences was established to commemorate Dr. Setsuro Fujii, a former professor at Tokushima University, who made significant contributions to the development of numerous pharmaceutical drugs. The mission of the Institute is to conduct world-class, interdisciplinary bioscience research that drives innovation in society. The institute provides state-of-the-art facilities to support pioneering research and groundbreaking discoveries.

URL: <https://www.fujii.tokushima-u.ac.jp/>

### Diabetes Therapeutics and Research Center

Diabetes Therapeutics and Research Center is focusing on basic research and clinical therapeutics to overcome diabetes, serious health problems not only in Tokushima, but also all over the world.

The mission of this center is to build up a platform for translational medicine, which brings basic research to clinical practice for diabetes care from region to the world.

URL: <https://www.iams.tokushima-u.ac.jp/dtrc>

## Institute of Post-LED Photonics

The Institute of Post-LED Photonics (pLED) was established in March 2019 as the core research facility in Tokushima Prefecture's Plan for Industrial Development and Youth Employment Creation by the Creation and Application of Next-Generation Light, which was selected to receive a grant under the Cabinet Office's Regional University and Regional Industry Creation Grant Project. pLED's objective is to further enhance Tokushima University's strengths in photonics research by creating and applying light in new ways. The use of photonics has conventionally been focused on the visible spectrum and near infrared light. pLED conducts advanced research aimed at expanding applications to encompass both deep ultraviolet at the short-wavelength end of the spectrum and terahertz radiation at the long-wavelength end. This research includes the development of next-generation light sources and interdisciplinary research for medicine and photonics, which will contribute to the development of local industry and the achievement of a creative super-aging society.

pLED practices what we call “borderless photonics,” an initiative that seeks to eliminate research and organizational boundaries and the siloing of fields to combine people and knowledge in an effort to interweave infrared, terahertz, and deep ultraviolet light with technological applications in the realms of medical care and metamaterials. We also undertake collaborative research with an array of universities, research institutes, and companies, both within Japan and overseas.

By pursuing a flexible new approach to laboratories, we hope to further accelerate research and feed its benefits back to society.

URL: <https://www.pled.tokushima-u.ac.jp/>

## Center for Community Engagement and Lifelong Learning

The Center for Community Engagement and Lifelong Learning was founded in April 2019 with the merger of the Center for University Extension, which organized numerous extension courses; the Center for Community Revitalization, which operated satellite offices and undertook a range of other regional revitalization activities; and the Center for Research Administration & Collaboration's Division of Human Resource Development for Industry, which provided lifelong learning programs for company employees, primarily in the manufacturing sector. The Center for Community Engagement and Lifelong Learning also absorbed the Secretariat of the COC Plus Promotion Headquarters, which implements the Tokushima Genkijirushi Innovation Program for Human Resource Development.

As Tokushima University's hub for lifelong learning and community engagement, the Center endeavors to contribute to the community by promoting efforts to resolve the issues it faces and create an affluent local community.

URL: <https://www.tokushima-u.ac.jp/ccell/>

## Center for Administration of Information Technology

In order to carry out smoothly the university-wide ICT policies and information-related work for education, research, social contribution and organization administration at the university, we support information education and the implementation of ICT in each department, while conducting research and development in ICT. Taking advantage of the Center's experience in ICT and information security management systems, we support the development of human resources and information security activities in local communities.

URL: <https://www.ait.tokushima-u.ac.jp/>

## Advance Radiation Research, Education, and Management Center

The Center is a facility used for education and research conducted using radioactive isotopes. It also conducts radiation safety management of radioactive isotopes, and research, development, and information collection for that purpose. In addition, it plays a comprehensive and central role concerning radiation such as providing necessary education and training for research staff and students engaged in radiation work and supporting research, contributing to the advancement of education and research. We aim to contribute to the dissemination of knowledge concerning radiation in the local community.

URL: <https://www.tokushima-u.ac.jp/arremc/>

## Research Center for Higher Education

In order to strengthen our consistent education and student support from student admission to job placement, we work on student selection, education reform, ICT-based education, innovative education, international education, student life, and career formation by utilizing data which can contribute to quality assurance of education from a university-wide perspective. By adding related teachers and staff and supporting the operation, we aim to consolidate and improve operations through cooperation between organizations and teaching staff collaboration.

URL: <https://www.tokushima-u.ac.jp/highedu/>

## Research Center for Management of Disaster and Environment

We promote research on local disaster prevention and conservation of the natural environment, and we aim to fulfill our responsibility to contribute to the community through community-based activities.

The Center was established in 2004 to conduct general research into the environment and disaster prevention. From 2010, it was made one of the Joint Institutes for Education and Research. In order to undertake both local disaster prevention measures and environmental protection, the center promotes organic cooperation between a wide range of academic fields including engineering, science, humanities and social science, medicine, pharmacology, dentistry and nursing science.

URL: <https://www.tokushima-u.ac.jp/rcmode/>

## Center for Research Administration & Collaboration

We support the development of a research environment and promote various collaborations and technology licensing with companies.

Our mission is to facilitate and promote cutting-edge research at Tokushima University by:

- Establishing research collaborations and partnerships with industry
- Promoting the intellectual property of research results
- Supporting the establishment of university-originated start-up companies
- Supporting grant applications

We also aim to collaborate and cooperate with industry, academia, government, and citizens as a single entity to meet the challenges of the Sustainable Development Goals (SDGs).

URL: <https://www.tokushima-u.ac.jp/ccr/>

## AWA Support Center

AWA Support Center provides career support for female researchers and undertakes support activities focused on improving their research capabilities. We also implement measures to support all staff and faculty members in achieving a good work-life balance.

In undertaking our activities, we will strengthen the Shikoku regional networks we have built up through projects to date, and keep in view the potential for collaboration with the local community and industry-government-academia partnerships, with the aim of becoming a university that can realize the benefits of a society based on gender equality.

URL: <https://www.awasapo.tokushima-u.ac.jp/>

## Center for Teacher Education

We promote the maintenance and consolidation of teacher training courses, liaising and cooperating with education-related institutions within and outside the university, with the aim of raising the quality of teacher development and in-service teacher training.

## Advanced Research Promotion Center

The Advanced Research Promotion Center was established to provide high-level research support relating to bioimaging and animal research covering the university as a whole. The Bioimaging Department supports cutting-edge imaging research activities from molecules to animals, and the Animal Resources Research Department conducts education and research on animal experiments throughout the university, supporting the breeding and management of experimental animals, development, and animal experiments.

**Tokushima Biomaging Station**  
URL: <http://www.tbis2013.net/>

**Division for Animal Research Resources and Genetic Engineering**  
URL: <http://cms.db.tokushima-u.ac.jp/DAV/organization/10998/>

## Center for Design-Oriented AI Education and Research

The Center for Design-Oriented AI Education and Research was established in April 2020 with the aim of fostering human resources who can use AI and data science technologies to solve social issues with design thinking. The Center has three divisions: Promotion of AI Education division, AI Research and Development Division, and AI Social Implementation division. The Center promotes AI and data science education inside and outside the university, develops interdisciplinary AI research, and contributes to the social implementation of AI and regional economic development.

URL: <https://www.tokushima-u.ac.jp/ai/>

## Industry-University R&D Startup Leading Institute

The Industry-University R&D Startup Leading Institute was established in July 2023 to facilitate the smooth transition of research into commercialization. The institute supports the development of prototypes that aid in decision-making regarding the commercialization of various technologies developed at the university. Through these R&D activities, it also promotes developments of personnel with an industrial mindset both within the university and beyond.

The institute consists of two semi-independent divisions: one dedicated to R&D activities and entrepreneurial education centering on the "Monozukuri" (craftsmanship), and the other focusing on next-generation optical technologies and human resource development.

URL: <https://industrial.tokushima-u.ac.jp/>

## Bio-Innovation Research Center

The Bio-Innovation Research Center (BIRC) was established to promote open innovation in the arenas of new bioindustries and sixth industrialization through collaboration by Tokushima University with the local community and industry. Selected by the Ministry of Economy, Trade and Industry (METI) as a regional open innovation hub, BIRC serves as a focal point for networks linking the university with companies. In this role, it carries out innovative research activities and education focused on the future of the agriculture, forestry and fishery industries, food, and health, and also promotes the development of human resources to support innovation by local industry and the creation of university startups and other new industries.

BIRC was selected for inclusion in the strand of METI's FY2021 Grants for Projects Promoting Academic-Industrial Collaboration program focused on developing hubs for university-society open innovation. Under this program, the construction of a facility for collaborative research with researchers from companies and the like (the Vortex Building) was completed in August 2023 to serve as a hub for university-society open innovation. We are using it to pursue collaborative research based on several research topics developed at BIRC, with the aim of achieving social implementation.

URL: <https://www.birc.tokushima-u.ac.jp/>

## Archaeological Heritage Management Office

We conduct the following work concerning excavations of buried cultural properties necessitated when facilities are improved; (1) Planning and implementation of execution plans, (2) Organization, storage and preservation of excavated buried cultural property, (3) Preparation of reports, (4) Other necessary matters concerning excavations of buried cultural properties.

URL: <http://tokudaimaibun.jp/>

## Shikoku Innovative and Collaborative Organization for Industry, Academia and Government

Shikoku Innovative and Collaborative Organization for Industry, Academia and Government (SICO) aims to create innovation from Shikoku region through improving our operational efficiency by organizing and consolidating the duplication of tasks relating to the work common to industry-academia-government collaboration among the five universities (Tokushima University, Naruto University of Education, Kagawa University, Ehime University, and Kochi University). We are working to enhance both the quality and quantity of knowledge across all the participating universities, accumulating knowledge, developing human resources, establishing contacts between universities and societies in Japan and abroad, and creating a base for the creation of innovation.

URL: <https://www.tokushima-u.ac.jp/ccr/active/project/sico/>

## University Library

The University Library comprises two facilities supporting education and research. The Main Library on the Josanjima Campus serves as a general library, while the Life Sciences Library on the Kuramoto Campus is a library covering medical, dental, and pharmacological subjects.

The collection of books covers a wide range of material such as books on Japanese language and culture, as well as specialist books in various fields, from liberal arts and sciences to professional education.

The libraries have areas for both individual study and collaborative learning to accommo-

date various learning styles, and are also open to the general public to support lifelong learning and to promote the culture of the local community.

URL: <https://opac.lib.tokushima-u.ac.jp/library/>

## University Hospital

The hospital currently comprises 28 medical clinics, 10 dental clinics, and 65 central clinical facilities. It has 692 beds. As an advanced treatment hospital, it provides leading edge medical and dental care.

In addition, using the geographical proximity of Tokushima University Hospital and Tokushima Prefectural Central Hospital to the maximum, the two hospitals aim to capitalize on their human and infrastructural characteristics to pursue further cooperation towards an effective division of functions. They have completed the general medical zone that aims to improve the quality of medical care in the prefecture as a whole.

Bearing in mind the keywords of regional healthcare, coordination and functional differentiation, Tokushima University Hospital will foster medical professionals with high ethical standards, seeking to develop advanced medical care characterized by a global vision that is grounded in the local community.

### Number of Patients in Each Clinical Division

Medical Division		Dental Division	
Inpatients	198,179	Inpatients	4,140
Outpatients	368,719	Outpatients	105,319

URL: <https://www.tokushima-hosp.jp/pr/magazine.html>

URL: <https://www.tokushima-hosp.jp/en/>

## Institutional Research Office

This office was established as an organization for collaboration between academic and administrative staff, with the objective of supporting education, research, social contributions, medical care, and management at Tokushima University by gathering, analyzing, and managing information about various matters both within the university and outside it, thereby contributing to university reform.

### Principal duties

- (1) Supporting decision-making and making recommendations concerning university management
- (2) Gathering, analyzing, and reporting information, and supporting analysis by each division of the university
- (3) Evaluating the state of activities by university organizations and supporting performance appraisals of academic staff
- (4) Formulating mid-term goals and mid-term plans, and supporting self-assessment activities

URL: <http://cms.db.tokushima-u.ac.jp/DAV/organization/276983/>

## Academic Collaboration Office with Technion

Tokushima University, Technion-Israel Institute of Technology (Technion), and Nichia Corporation have embarked on a long-term, mutual collaboration that distinguishes us from conventional international partnerships. This initiative aims to enhance the research capabilities of each institution and foster outstanding researchers prepared to excel on a global stage.

To advance this university-wide collaborative initiative, Tokushima University launched the Academic Collaboration Office with Technion (ACOT) on November 1, 2020. This office facilitates international collaborative research projects as well as the exchange program for early-career researchers within the framework of the Tokushima International Science Institute (TISI).

Additionally, the ACOT organizes educational programs, including special seminars featuring leading researchers from Technion and international student exchanges.

## Health Service, Counseling and Accessibility Center

The Center aims to maintain and promote the health of students and staff, and ensure a good study and work environment. It consists of the following three divisions.

- (1) Health Service Division (Health Service Center)

This facility aims to maintain and promote the mental and physical health of all members of the university, students and staff alike. As well as conducting various medical examinations, it provides medical care, assists in health management, and provides health advice.

- (2) Student and Staff Counseling Division (Counseling Center)

This center provides a counseling service to assist all university members in dealing with a variety of concerns. It offers expert advice to both students and staff alike concerning issues specific to their respective standpoints.

- (3) Accessibility Division (Accessibility Center)

To enable students with disabilities to enjoy a comfortable student life, staff at this center listen to their concerns, draw up plans for the accommodations they require to pursue their studies or research, and work with the relevant faculties and graduate schools on the delivery of those plans.

## Job Support Center for the Challenged

In collaboration with special support schools and other organizations within the university, we support people with disabilities to get jobs, and contribute to promoting employment for them. We aim to create and enhance an environment that supports lifelong development of people with disabilities, and to support the social and occupational independence of them. We perform cleaning of the building and the campus and support the work of each department, and accepting students on workplace training from special-needs schools.

# Endowed Chairs

Department Name	Name of Endowed Chair	Foundation Date	Period	Company Name
Graduated School of Biomedical Sciences	Department of General Medicine and Community Health Science	December 1, 2013	3 years × 2 terms 4 years × 1 term 2 years and 4 months × 1 term	Shikoku Central Hospital of the Mutual aid Association of Public School teachers
	Department of General Medicine	April 1, 2014	1 year update	Tokushima Prefecture
	Department of Orthopedic Reconstructive Surgery	July 1, 2014	5 years × 1 term 2 years × 1 term 3 years × 1 term	Senko Medical Instrument Mfg. Co., Ltd. Japan Medical Dynamic Marketing, Inc. Surgical Spine, Inc. Nipro Corporation
	Department of Community Medicine and Human Resource Development	February 1, 2015	4 years and 2 months × 1 term 3 years × 2 terms	Ehime Prefecture Shikoku Central Hospital of the Mutual aid Association of Public School teachers

# Key Dates for Academic Year

## First Semester (April 1 – September 30)

April 1 – April 5	Spring Vacation
April 1 – April 9	New Student Orientation
April 7	Entrance Ceremony
August 1 – August 31	Summer Vacation

## Second Semester (October 1 – March 31)

November 2	University Anniversary
December 25 – January 7	Winter Vacation
March 22	Graduation Ceremony
March 25 – March 31	Year-End Vacation

## Basic Data

- Number of Students 7,525
- Number of Staff 2,354

(Faculties 6,008, Graduate School Master's and Doctoral Courses 1,517)

(Executive Director 9, Professors 240, Associate Professors 187, Lecturers 132, Assistant Professors 208, Designated Teachers 154, Clerical Staff · Technical Staff · Medical Staff 1,424)

- Finance (FY 2023) Unit: million yen

Revenues 55,714

[Management Expense Grants for National University Corporations 12,310, Self-income 33,208 (Hospital Revenue 28,861)]

Expenditures 54,162

[Expenses for Education and Research 15,643, Expenses for Hospital 27,505]

## Location & Transportation

### Transportation

#### Tokyo

##### ■ Airplane

Tokyo (Haneda) to Tokushima  
[about 80 minutes]

#### Nagoya

##### ■ JR Shinkansen and Highway Bus

JR Shinkansen: Nagoya to Kobe (Shin-Kobe)  
[about 60 minutes]  
Highway Bus: Kobe (Sannomiya) to Tokushima  
[about 110 minutes]

#### Osaka

##### ■ Highway Bus

Osaka to Tokushima  
[about 150 minutes]  
Kansai Airport to Tokushima  
[about 180 minutes]

#### Kobe

##### ■ Highway Bus

Kobe (Sannomiya) to Tokushima  
[about 110 minutes]

#### Fukuoka

##### ■ Airplane

Fukuoka to Tokushima  
[about 60 minutes]

### Distance from JR Tokushima Station

#### Transportation · Time

- Shinkura Area (about 1km) about 5 minutes by taxi
- Josanjima Campus (about 2km) about 7 minutes by taxi
- Kuramoto Campus (about 4km) about 10 minutes by taxi

## University Crest

The crest is a design based on the letters U and T, standing for University and Tokushima.

The square background represents Shikoku where Tokushima University is located. The overlapping U symbolizes the contributions of the university's scholarship and education to the development of the local and international community, as well as the inheritance of knowledge and culture. The colors represent Yoshino River symbolizing the perpetual flow of promising personnel from Shikoku to the world, the blue sky and blue sea of Tokushima symbolizing the aspirations of youth, and indigo, one of Tokushima's native products.

(Adopted on 2001)

## Communication Mark

This symbol represents the venue for unique, vibrant, future-oriented education and research cultivated by Tokushima University for 60 years based on a progressive spirit. The five colors represent the following concepts.

- A place for forming character of abundant professionalism and humanity
- Research that pursues the truth through unfettered thought
- The center of a network of knowledge which links the local community with the world
- The beautiful natural environment of Tokushima Prefecture and the greenery of the city, especially Mt. Bisan and Shiroyama
- The rich aquatic environment, especially the Yoshino River

The typeface is Trajan, based on an inscription on Trajan's Column. This Roman script represents the history of academic pursuits and the tradition and dignity of the university.

The illustration on the left represents the dynamism of a fresh start with the fluidity of water.

(Adopted on 2010)

In accordance with Article 109 Paragraph 2 of the School Education Act, Tokushima University has undergone university evaluation and met the evaluation standards for a university. (March 24, 2020)

Certified evaluation organization: National Institution for Academic Degrees and Quality Enhancement of Higher Education

Certification period: Seven years
